Aluminium Rainwater Solutions

evolved with the environment in mind

- 120mm half round beaded edge gutter
- 63mm circular downpipe system
- Evolve is available in Heritage Black ex stock

The innovative **JuraJoint**, which combines the advantages of both EPDM rubber and high performance silicone, making jointing quick, straightforward and secure.

Aligator® Classic

Made from high tensile aluminium, Classic is a decorative ogee gutter with all the benefits of other aluminium systems but at a substantially lower price. Choose Classic in the standard finish of Heritage Black and save even more money. Classic utilises the proven Aligator® joint, but with external union fittings to maximise flow capacity.

Modern systems

The modern range of Alutec gutters can be used on many different styles and types of building. This range features the Aligator® snap fit joint method. Featuring an internal gutter union and concealed fascia bracket to provide a smooth uninterrupted line at the eaves of the building. This method not only provides a secure joint, but can also reduce installation times by up to 40%.

Traditional range

Traditional gutter systems are designed specifically for replacement of old cast iron gutters or to reflect the traditional style of the building. Offered as an additional colour, a special coating is available - Heritage Black, a textured finish, which gives the look, feel and appearance of painted cast iron.

Aligator® Classic

Exceptional value!

Modern systems

Classic has a 120 x 75mm ogee style profile, ideal for the following applications:

- Local authority or housing association
- Multi occupancy dwellings
- Private houses

Classic can be installed with square or circular downpipe.

Aligator® Deepflow
130 x 80mm

Aligator® No 46 Ogee
155 x 100mm

Aligator® Boxer
120 x 80mm
135 x 100mm
160 x 100mm

Aligator® Giant
200 x 150mm

Aligator® Viscount
150 x 121mm

Aligator® Box Eaves

175 x 150mm – High capacity gutter with integrated facility for supporting soffit panels

102mm x 76mm

Circular

Evolve downpipe is a low cost circular aluminium downpipe with a choice of eared or non-eared socket supplied separately. Evolve pipe is also ideal for use with Classic ogee gutter. Traditional circular downpipe is available with an integral eared and non-eared socket in 1m, 2m and 3m lengths.

Square and Rectangular

* 62mm Classic square pipe has been designed specifically for use with Classic ogee gutters.

Vandal Resistant

Available as square or rectangular downpipe. Vandal resistant pipe is ideal for use in public areas. Direct back to wall fixing with no projecting profiles render the pipe non-climbable.

Rainwater Colours

Nordic Silver
Only available in
the Evolve range

**Available ex stock in
Heritage Black**
